# Why Drones Are Necessary

For security purposes

# Increased Safety

- Pilots don't have to be inside drones.
- Drones can be controlled remotely from a safe distance.
- Equipped with many sensors for guiding
- Can secure a perimeter, preventing intruders from causing damage.

# Can be Used in Disasters

- Can fly into inaccessible areas
- Can be used for locating victims and assessing damage
- Can quickly deliver resources to/from places.
- Wildfire prevention.

# Money is Saved

- Drones don't need to house pilots, requiring less resources to build
- Smaller cost of fuel
- Less flying experience required
- Less money needed for pilot safety

# Protecting the Nation

- Quickly retaliate against terrorists.
- Can fly for longer periods of time surveying areas.
- Allow for easy gathering of intelligence from enemies.
- Can be used for missions that require light ordinance
